Inmate Name: SELEZNEV, ROMAN VALEREVI	Reg #: 04385-093
Date of Birth: 07/23/1984	Sex: M Race: WHITE Facility: SET
Encounter Date: 05/29/2015 13:02	Provider: Smith, Darin PA-C Unit: E02

Mid Level Provider - Sick Call Note encounter performed at Health Services.

**SUBJECTIVE:**

**COMPLAINT 1**      **Provider:** Smith, Darin PA-C

**Chief Complaint:** Headache

**Subjective:** Inmate SELEZNEV, ROMAN identified by name and picture id, is a 30 year old Male presenting for follow up of chronic headaches and seizures. States that he continues to have headaches and that his seizure activity has worsened lately. He had a seizure on 5/14/15 and states that he doesn't remember anything for five days following this. He was seen yesterday and started on amitriptyline for his headaches which seems to help. Review of notes show that he did have a seizure and had some stopped communicating post seizure except for some slight Russian comments (native language). It was found that he had just returned from court where he apparently received some bad news and fired his lawyer. Behavior aspect of his seizure and subsequent refusal/ability to speak was considered. Carbamazepine levels were drawn and shown to be in therapeutic range. During the seizure on 5/14/15 he demonstrated selective muscle coordination and control.

Original injury was an explosion from a suicide bomber in Maraca in 2011. He reportedly was in a coma for a few days after the bombing and subsequent surgeries to put his skull back together.

**Pain:** Yes

**Pain Assessment**

**Date:** 05/28/2015 07:53  
**Location:** Head  
**Quality of Pain:** Aching  
**Pain Scale:** 5  
**Intervention:** to be prescribed Elavil  
**Trauma Date/Year:**  
**Injury:**  
**Mechanism:**  
**Onset:** 1-5 Years  
**Duration:** 1-5 Years  
**Exacerbating Factors:** previous head trauma  
**Relieving Factors:** pain medications

Yes: Within Normal Limits, Poor food intake

**Skin****Wound**

Yes: Clean, Dry and Intact

No: Wounds present, Signs and/or Symptoms of Infection, Redness

**Lesions**

No: Present

**Exam Comments**

Patient was observed while he was undressed and dressed by the SHU officers and no injuries were observed over the patients, feet, legs, buttocks, abdomen, chest, back, hands, arms, neck, face, and head (other than preexisting scars over patients Skull from previous traumatic injuries).

Patient may be un-cooperative or tired from illness or post-ictally, but he was initially observed to be lying down in the SHU changing (strip) cell and refused to undress/dress his self. Two officers and the Operations LT helped him undress/dress and he was placed in a wheel chair and rolled to his SHU cell where he was assisted to get onto his lower bunk. He refused a dinner meal that was offered to him.

**ASSESSMENT:**

Other medical exam for administrative purposes, V70.3 - Resolved, History/Resolved, Initial

**PLAN:****Disposition:**

Follow-up in 4-8 Hours

Notify Medical Duty Officer

Notify Psychology Duty Officer

**Other:**

Discussed patient's presentation with Dr Dy.

Notified Dr Low that patient was possibly beginning to refuse meals, and possibly refusing to cooperate in other ways and would be celled alone initially.

**Patient Education Topics:**

**DTR Patellar L2/L3/L4**

Yes: 2+ Normal Reflex

**Clonus**

Yes: Ankle Clonus Absent

**ROS Comments**

Patient doesn't respond verbally during this exam, possibly secondary to post-ictal state- or behaviorally after "firing his lawyer" yesterday.

Swallows without problem but wouldn't speak during exam-post-ictal versus behaviorally?

Patient is slow in following directions, possibly post-ictally or behaviorally.

Appeared in control of his urination.

He is reported to have lied in bed all day, isn't believed to have eaten.

Right tympanic membrane may be scarred(history of head injury/explosions?)

**ASSESSMENT:**

Seizure disorder, other convulsions, 780.39 - Current, Chronic, Not Improved/Same

**Exam Comments**

Last Carbamazepine level was 9.5 on 8/21/14. Healed surgical scars on scalp.

Pt laying on Treatment Room exam table with eyes open. He does not respond to subjective questioning. Poor effort with motor/strength exam but he withdraws from painful stimuli in extremities. DTR's normal. No loss of bowel/bladder control. He is able to remain seated (w/slumped posture) on exam table and in wheelchair during transport back to housing unit. He can move from exam table, to wheelchair, and to bottom bunk with some assistance.

**ASSESSMENT:**

Seizure disorder, other convulsions, 780.39 - Current, Chronic, Not Improved/Same

**PLAN:****Disposition:**

Follow-up at Sick Call as Needed

Follow-up at Chronic Care Clinic as Needed

**Other:**

Pt has seizure disorder, but is compliant with pill-line administered medication and last level was within therapeutic range. Per custody staff warning, he is an escape risk and went to court yesterday so secondary gain has to be considered. No subjective information given by patient, but inmate & Staff report suggests that he may have had a brief seizure. His exam revealed poor effort but neurological findings reassuring. Doubt true aphasia - consider malingering vs conversion/somatization. No additions/changes to current medication and monitoring in place.

Monthly SHU Review Note

Note: This SHU Review is a brief evaluation of this inmate's current mental status in SHU. Although an inmate may exhibit adequate adjustment to their SHU confinement and a lack of acute distress at this time, it does not preclude the fact he/she may suffer from a psychological disorder requiring additional psychological services. This SHU Review is also not a risk assessment of an inmate's potential for violent behaviors. Rather, it is an assessment of whether the inmate exhibits an aggressive or violent behaviors at the time of the SHU Review.

Inmate SELEZNEV was seen by Psychology Services for a 30-day SHU Review. He reported no significant mental health problems or concerns. SHU Staff were consulted with regarding this inmate's functioning prior to documenting this 30-Day SHU Review. Further, all inmates housed in SHU and Cell Restriction were discussed at the weekly SHU Meeting.

He indicated that his adjustment was good, although he speaks limited English. His appearance, sanitation, and hygiene was adequate. His mood was unremarkable and his affect was appropriate. SELEZNEV did not demonstrate delusions or ideas of reference. He denied any current suicidal or homicidal ideation, plan, or intent.

The inmate is aware of a Psychology Services Self-Help Book Cart in SHU and is able to read these books while in SHU upon request. The SHU Officer assists inmates with this book cart in addition to the Education Department and Religious Services Book Carts.

No non-routine psychological intervention is required at this time. SELEZNEV will be seen for a SHU Review in 30 days or less if still housed in SHU. Psychology Services will follow-up at the inmate's or staff's request.

SEATTLE WA 98198

-----TESTS-----RESULTS-FLAG-----REF. RANGE-----UNITS

8369/Chantilly

Hepatitis B Virus DNA, Quantitative, Real-Time PCR

Hepatitis B Virus DNA 1573 H

&lt;20 IU/mL

Hepatitis B Virus DNA 3.20 H

&lt;1.30 Log IU/mL

To convert International Units/mL to copies/mL,  
use the following conversion factor:

$$1 \text{ IU/mL} = 5.82 \text{ copies/mL}$$
**Please note:**

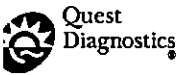

Due to character limitations of some clients' LIS systems, viral load values greater than 10 million are reported using scientific exponential notation. For example a result of 10 Million (10,000,000) is reported as 10.0E6 IU/mL or copies/mL. If your LIS will accept the number of characters required for viral loads greater than 10 million, please contact your local service representative to have this reporting convention changed.

The method used in this test is Real-Time PCR of the pre-core region of the circular HBV genome.

This test was performed using the COBAS(R) AmpliPrep/COBAS(R) TaqMan(R) HBV Test, v2.0 (Roche Molecular Systems, Inc.)

The performance characteristics of this assay have been determined by Quest Diagnostics Nichols Institute. Performance characteristics refer to the analytical performance of the test.

JUNE 10

INMATE REQUEST TO STAFF CDFRM

RECEIVED

U.S. DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF PRISONS

TO: (Name and Title of Staff Member) <i>Medical</i>	DATE: <i>9-18-14</i>
FROM: <i>ROMAN SELEZNEV</i>	REGISTER NO.: <i>04385093</i>
WORK ASSIGNMENT: <i>N/A</i>	UNIT: <i>EB</i>

SUBJECT: (Briefly state your question or concern and the solution you are requesting. Continue on back, if necessary. Your failure to be specific may result in no action being taken. If necessary, you will be interviewed in order to successfully respond to your request.)

*I would like to have my eye examined and buy glasses. I can not see television.*

*Thanks*

*G*

(Do not write below this line)

DISPOSITION:

- Bring vision*
- 8 PM / 10:10*
- Glasses before: Rhinoceros and 1 TV*
- Reassigned*

## HIV COUNSELING DOCUMENTATION CDFRM

U.S. DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF PRISONS

Directions:

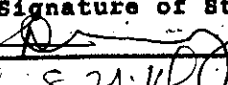

Use the following criteria to counsel the patient who is tested for the HIV antibody. Check off each item as they are discussed. Write NA beside any item that is inappropriate to the situation. The reverse side of this form will be utilized to document seronegative and inconclusive test results. File in the patient's record, documenting in progress notes that counseling was completed.

Explained in: (circle) English Spanish Other \_\_\_\_\_ (specific language)

PRE-TEST:

- ☒ 1. Explain purpose of session.
- ☒ 2. Explain confidentiality.
- ☒ 3. Explain HIV antibody test.
- ☒ a. What AIDS is
- ☒ b. What the test is
- ☒ c. Test Procedure
- ☒ d. Meaning of test results
- ☒ e. Inability of detecting early infection (false negatives)
- ☒ f. Potential need for additional testing
- ☒ g. Significance of a positive test.
- ☒ 4. List risk factors/clinical signs: (check all that apply)
- ☒ a. Injecting drug use, sharing drug or tattoo equipment
- ☒ b. Unprotected or multiplex sex partners
- ☒ c. Treated for: sexually transmitted infections, hepatitis, or TB
- ☒ d. Clinical s/s: fever or illness of unknown cause, symptoms of AIDS opportunistic infections.
- ☒ e. Exposure: recent occupational or non-occupational exposure/incident.
- ☒ f. Pregnant female
- ☒ g. Other:
- ☒ 5. Obtain informed consent (when applicable)
- ☒ 6. Risk Reduction Behaviors. Educational material given.
- ☒ 7. Patient Reactions/Comments.
- ☒ 8. Explain how the patient will be notified of the results.

The above information has explained to me in a language I can understand.

Signature of Inmate 	Signature of Staff Counselor W. MANANGAN

Institution FDC SEATAC

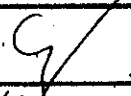

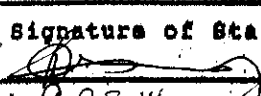

File in the Medical Record: Section 6.

## HIV Post Counseling Documentation

Seronegative

- ☒ 1. Explain purpose of session.
- ☒ 2. Review confidentiality.
- ☒ 3. Test Information
- ☒ a. Inform patient of negative test result.
- ☒ b. Explain purpose of test.
- ☒ c. Identify remaining risks.
- ☒ d. Explain inability of test to detect early infections. (false negatives)
- ☒ 4. Explain risk reduction behaviors (high risk)
- ☒ 5. Discuss follow-up testing (high risk)
- ☒ 6. Give additional education material if requested.
- ☒ 7. Patients Reactions/Level of Understanding/Comments

The above information has been explained to me in a language I can understand.

Signature of Inmate 	Signature of Staff Counselor  W. MANANGAN CONTRACT PHLEBOTOMIST PDO SEATAC
Date: 09/23/14	9.23.14

\*\*\*\*\*

Inconclusive Test: (neither seronegative or seropositive)

- ☐ 1. Explain purpose of session.
- ☐ 2. Confidentiality review.
- ☐ 3. Test Information
- ☐ a. Inform patient of inconclusive test results.
- ☐ b. Explain meaning of test results.
- ☐ c. Identify remaining risks.
- ☐ 4. Explain risk reduction behaviors.
- ☐ 5. Discuss when and how repeat testing will occur.
- ☐ 6. Patients Reaction/Level of Understanding/Comments.

The above information has been explain to me in a language I can understand.

GFR units measured as mL/min/1.73m<sup>2</sup>.

If African American multiply by 1.210.

A calculated GFR &lt;60 suggests chronic kidney disease if found over a 3 month period.

Date

I, ROMAN SELEZNEV 04385-093, refuse treatment recommended by the Federal Bureau of Prisons Medical staff for the following condition(s):

**DESCRIBE CONDITION IN LAYMAN'S TERMINOLOGY:**

Rectal and genital examinations

**The following treatment(s) was/were recommended:**

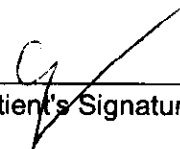

As above

**Federal Bureau of Prisons Medical staff members have carefully explained to me that the following possible consequences and/or complications may result because of my refusal to accept treatment:**

Inability to diagnose and treat rectal bleeding, hemorrhoids, STDs, cancers, inguinal hernias, and other diseases of these parts of the body.

**I understand the possible consequences and/or complications, listed above, and still refuse recommended treatment. I hereby assume all responsibility for my physical and/or mental condition, and release the Bureau of Prisons and its employees from any and all liability for respecting and following my expressed wishes and directions.**

## CONSENT TO USE OF MOOD STABILIZING MEDICATION

CDFRM

U.S. DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF PRISONS

I, ROMAN SELEZNEV, Reg. # 04385-093, hereby authorize Dr. Dy, Maria Luisa MD or his/her relief (designee), to prescribe (Circle One) ~~carbamazepine (Tegretol)~~, valproate (Depakote, Depakene), lamotrigine (Lamictal), levetiracetam (Keppra), or topiramate (Topamax), ~~oxcarbazepine (Trileptal)~~, gabapentin (Neurontin), an anticonvulsant medication with mood stabilizing effects, to me and to continue said medication as is recommended for my psychiatric treatment.

1. This medication is useful because it has been found to be effective in treating various mood disorders and its associated symptoms including mood swings, excitability, irritability, anxiety, impulsivity, euphoria, depression, pressured speech, poor judgement, anger, sleeplessness, excessive energy, and racing ideas. They are particularly helpful for rapidly fluctuating moods and associated symptoms.

2. This medication may improve your condition by relieving all or some of the symptoms mentioned above.

3. Common side effects to this medication include, but are not limited to, weight gain (valproate), sedation, cognitive slowing, nausea, diarrhea, incoordination, and vision changes. Less common but potential side-effects include elevation of liver enzymes, inflammation of the pancreas (esp. valproate) and bone marrow suppression with a decrease in blood cell counts (carbamazepine). There is a risk of serious infection or even death should severe bone marrow suppression occur. To limit these risks, blood counts and blood levels will be monitored along with appropriate liver studies on an ongoing basis. You should notify health services regarding any signs of unusual bleeding, fever, sore throat, nausea and vomiting, severe stomach pain, or loss of appetite. A possible rare adverse effect of topiramate is metabolic acidosis, a decrease in serum bicarbonate. Signs may be hyperventilation, loss of appetite, irregular heartbeat, confusion, stupor. Additionally, eye problems rarely develop and any visual changes or eye pain should be reported to health services. Rarely, lamotrigine can cause very serious rashes which can be life threatening. All rashes should be reported to health services as soon as possible. The risk for development of this rash can be minimized by starting at a low dose, slowly increasing the dose, and avoidance of valproic acid in addition to lamotrigine. This rash generally develops in the first 2 to 8 weeks but can rarely occur after this.

If any of the above symptoms occur, you should notify Medical Staff at sick call as soon as possible.

4. Not taking this medication as prescribed by the physician's instruction may lead to a worsening of symptoms. However, some symptoms of mood disorders may get better or even go away without taking medication.

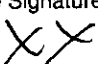

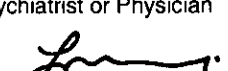

5. Other treatment options may include other medication with similar benefits. Other drugs may cause some of the same side effects you might experience with this medication.

Based upon interview, assessment, and medical record review, it is my opinion that this patient **is not competent** to give consent.

Physician Signature \_\_\_\_\_

Other Issues Discussed: PTSD and Seizures

The patient certifies that he/she has read the foregoing, or has had it explained in a language they understand, hereby consents to treatment and has no additional questions. Lines 1-5 above have been explained to the patient and based upon interview, assessment, and medical record review, it is the opinion that this patient understands the proposed treatment, and **is competent** to give consent. The patient may stop taking this medication at any time by contacting the physician, however, discontinuing the medication abruptly is generally not advisable.
